

TIME CLOCK

# Face Reader BP 300W

Eliminate buddy punching and take control of your payroll with our face recognition time clock. With dual HD camera technology this time clock captures a 3D facial image map for fast and accurate biometric identification. Built for today's modern workforce, the face clock delivers an unrivaled user experience. Employees just stand in front of the clock and it will quickly analyze and compare unique facial patterns for individual identification. Employees clock in/out without ever touching the time clock. Easily connects to the internet using WiFi or LAN. Its built-in infra-red-light source enables face identification in poorly lit environments. No middleware required. Both static and DHCP addressing supported.

## Time Clock Features

- ✓ Verify employee punches using 3D face recognition
- ✓ Hands-free face recognition. Employees don't have to touch anything for quick and easy clocking in/out.
- ✓ Easily connects to the internet through WiFi or LAN
- ✓ Face recognition for up to 1200 employees
- ✓ On-board backup so data is never lost
- ✓ Color LCD display with easy to use menu interface
