TIME CLOCK

Finger Reader
BP 200W

Protect your business from time card fraud and ensure a verified identity with every punch. Eliminate buddy punching and take control of your payroll. Register new employee's fingers in seconds. The finger reader is a low-price, feature-rich biometric time clock that matches the capabilities of more expensive time clocks. One of the fastest devices on the market, it offers unparalleled performance through an advanced, proprietary finger-matching algorithm that's reliable and precise. New upgraded optical finger sensor and enhanced algorithm improves reading of wet, dry, and rough fingers. The new color LCD display has an easy to use menu interface and the built-in keypad also allows for PIN entry. Easily connects to the internet using WiFi or LAN. No middleware required. Both static and DHCP addressing supported.

Time Clock Features

✔ Verify employee punches using a biometric finger scan
✔ Easily connects to the internet through WiFi or LAN
✔ Register up to 3,000 unique employees
✔ Keep employees accountable and eliminates buddy punching
✔ On-board backup so data is never lost
